

Language Interpretation

The creation of a 'rogue language'¹ set and how it differs²/influences³/changes⁴ people's interpretations/understanding from the intended meaning (as opposed to the common, literal meaning of an institutionalised language).

¹ 'Unofficial' language; sub-cultural language; slang, etc.

² How/how much does the meaning of the rogue language differ from the institutionalized language?

³ How does the meaning of a rogue term influence or *mould* the original meaning into a new meaning?

⁴ Over time, how does the 'new' rogue meaning *completely alter* someone's perception or understanding of what is actually correct? Does continual use of the rogue term *replace* the original term?
